Project Name	Project - Classification of Arrhythmia by Using Deep Learning with 2-D ECG Spectral Image Representation
Maximum Marks	2 Marks

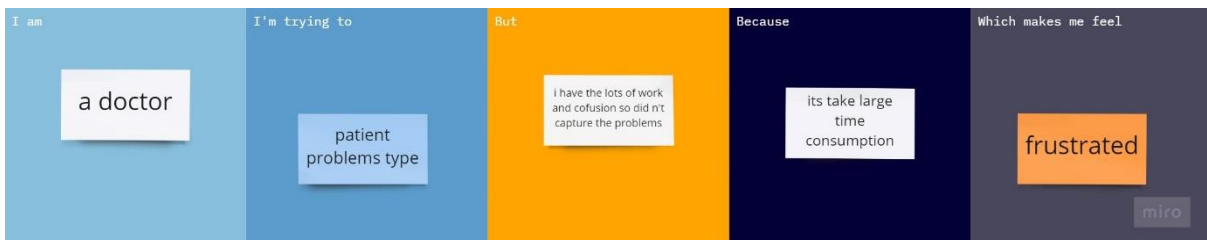

Patient Problem Statement:

Mr .Bhargav has affect by heart disease he can't identify his disease and what type his have. After he taking ECG report but he cannot identify his problem was severely affecting some heart problems and types.

Doctor Problem Statement:

Doctors may not assume the perfect solution for the patient. They did not identify the solution and the have lots of work so there will be not doing some of the small times. And its gives frustrated mental pressure. It takes lot of time to find accurate solution. But doctors face issues on more patient in emergency situation occurs regarding patient count , they are confusing which one to give the first preference.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Patient	Find disease type.	I faced issues in accurate description	I can't consult a doctors at any time.	So I feel feared.
PS-2	Doctor	Facing lots of issues.	Lots of confusion faced.	Its take large time consumption.	I feel frustrated.
